**INVESTMENT OBJECTIVE**

To seek long term capital appreciation by investing in smaller to medium-sized companies in the Asian Region i.e. companies whose assets, products or operations are in the Asian Region. In practice, at least 50% of the Sub-Fund's investment will be in companies whose free float adjusted market capitalisation at the time of purchase is less than USD 1.5 billion.

Past performance does not predict future returns. Please see a list of key risks and important benchmark information for this sub-fund on pages 2 & 3.

## IMPORTANT BENCHMARK INFORMATION:

The Sub-Fund is actively managed, seeking to deliver excess returns over the Sub-Fund's benchmark. The holdings may or may not be components of the benchmark and the Investment Manager has broad discretion to deviate from the benchmark securities, weightings and risk characteristics. The degree to which the Sub-Fund resembles the composition and risk characteristics of the benchmark is not a specifically targeted outcome and could vary over time, and the Sub-Fund's performance may be meaningfully different from the Sub-Fund's benchmark. Source of benchmark: MSCI. The benchmark is used for information purposes only and is calculated dividend reinvested. No benchmark is directly identical to the Sub-Fund and its performance is not a reliable indicator of future performance of the Sub-Fund. The benchmark from inception was the S&P Pan Asia Ex-Japan under USD 1.5 Billion Index. It was changed to the current benchmark with effect from 1 January 2016. The change was made as the Investment Manager considers the current benchmark more reflective of the Sub-Fund's investment strategy than the previous benchmark.

## GLOSSARY

**Alpha:** Measures the relative performance generated by the fund compared to the benchmark. An alpha of 1.0 indicates that the fund has outperformed its benchmark by 1%, after adjusting for risk of the benchmark.

**Beta:** Reflects sensitivity of the fund's returns to that of benchmark returns. A beta of 1.05 suggests that the fund could perform 5% better than the benchmark in up market and 5% worse in down market, assuming all other factors remain constant.

**Exit Fee:** Fee charged to investors when they redeem unit from a fund.

**Information Ratio:** Measures the funds returns above the benchmark returns relative to the risk (volatility) of the excess returns. It is a measure that identifies the consistency of the manager to outperform the benchmark.

**Initial Fee:** Fee charged to investors when they purchase units in a fund.

**Management Fee:** Percentage of the fund's assets that unitholders pay annually as remuneration to the investment adviser for managing the fund.

**Ongoing Charge / Ongoing Charge Fee (OCF):** Charge unitholders pay annually which relates to the costs of running a fund. The OCF takes into account the Investment Management Fee and all the expense of running a fund.

**R Squared:** Reflects the proportion of fund performance explained by changes in the benchmark. A high R-squared indicates the fund's performance has been in line with the benchmark. A low R-squared indicates the fund's performance has not been in line with the benchmark.

**Service Fee:** Percentage of fund's assets that retail unitholders pay annually for distribution services.

**Sharpe Ratio:** Measure of the fund's risk adjusted performance calculated as the portfolio returns in excess of the risk-free rate, divided by the risk (volatility) i.e. the Standard Deviation. The higher the Sharpe Ratio the better the returns compared to the risk taken.

**Total Expense Ratio (TER):** Estimated percentage (annualized) of fund assets used to pay for management fees and operating expenses, including service fees (if any) incurred by the fund. Fund expenses are reflected in the NAV. When calculating the TER, PineBridge has used the amount of expenses that it has received or estimated in its capacity as the Fund's Manager. Please note that the expense ratio includes variable expenses that are based on a number of factors including fund size, transactions, and other expenses. No assurance can be given that the TER will be realized over any future given period.

**Tracking Error:** Reflects the degree of variability of fund returns in relation to the benchmark. The lower the number the closer the fund's historic performance is to the benchmark.

Class: **R2D GBP****PineBridge Asia ex Japan Small Cap Equity Fund****KEY RISKS**

Potential Investors should consider the following key risks before investing in the Sub-Fund:

**Equity Investing Risk:** The value of shares and securities related to shares may fall due to issuer related issues, financial market dynamics and world events including economic and political changes. **Concentration Risk:** The Sub-Fund may invest in a limited number of securities compared to more diversified Sub-Funds or it may focus its investments and hold relatively large positions in, among other things, particular industries, countries, sectors, currencies or issuers. This may increase the volatility of the value of the Sub-Fund or for the Sub-Fund to bear losses and may also limit the liquidity of certain securities within the Sub-Fund. **Derivative Risk:** A Sub-Fund may use derivative instruments for both efficient portfolio management and for investment purposes. Derivative transactions may be subject to significant volatility which may result in a loss greater than the principal amount invested. **Counterparty Risk:** A Sub-Fund may have credit exposure (by virtue of position in swaps, repurchase agreements, FDI etc.) to its trading parties and may bear the risk of default of the counterparties. **Operational Risk:** A Sub-Fund may risk loss resulting from process failures, inadequate procedures or controls. **Currency Risk - Base Currency:** Securities may be denominated in currencies different from the Sub-Fund's Base Currency and there is a risk that changes in exchange rates and exchange control regulations may cause the value of the assets expressed in the Base Currency to rise or fall. **Emerging Markets Risk:** Emerging markets are typically smaller, less transparent, and subject to evolving, less stable political and regulatory regimes and securities from these markets may be more expensive to transact in, bear higher risk or have lower liquidity. **Counterparty Risk Depository and Sub-Custodians:** Custody services in many emerging markets remain undeveloped and there is a transaction and custody risk of dealing in emerging market investments. **Risks Relating to China:** Risks of investing in China arise from an uncertain taxation and political regime, restrictions on inward investment, dealing in closed currency and custody arrangements which are not to the same standard as those in developed markets and where the Sub-Fund invests in eligible China A-Shares via the Stock Connect, such investments are subject to risks including market, suspension and operational risks. **Liquidity Risk:** The risk that the Sub-Fund may invest some of their assets in illiquid securities and other illiquid financial instruments, in respect of which they may not always be possible to execute a buy or sell order at the desired price or to liquidate the open position.

The risk factors described above should not be considered an exhaustive list of risks, which potential investors should consider before investing in the Sub-Fund. For more details on the fund's potential risks please read the Prospectus and Key Investor Information Document at [pinebridge.com/funds](http://pinebridge.com/funds)

**ACCESSIBILITY TO FUND DOCUMENTS AND IMPORTANT INFORMATION BY LOCATION**
