PineBridge Global Dynamic Asset Allocation Fund

**RISK DISCLOSURE:**

- The Fund adopts an asset allocation strategy, varying from time to time the combination of developed countries and emerging market equity securities, debt and money market securities, collective investment schemes and the other types of investments in line with the Manager's forward views.
- The Fund may be exposed to additional risks (e.g. asset allocation, emerging markets, equity, fixed income, collective investment schemes, market volatility, currency, country selection/concentration, below investment grade debt securities, investment in Russia, Eurozone debt crisis, sovereign debt, contract for difference risks, and risk associated with instruments with loss-absorption features, etc.)
- The Fund may use financial derivative instruments ("FDI") for efficient portfolio management (including hedging) and for investment purposes but will not use FDI extensively for any purpose. FDI may be used to provide exposure to and to take synthetic short positions on securities. The use of FDI may expose the Fund to various risks such as counterparty, liquidity, correlation, credit, volatility, valuation and settlement risks.
- Dividends, if any, may be paid out of capital of the Fund at the discretion of the Manager. This amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment and may result in an immediate decrease in the net asset value of the Fund.
- Investors may be subject to substantial losses due to investment loss risk and the leveraging effect of using FDI.
- Investors should not rely solely on this material to make investment decisions.
