GLOSSARY

Alpha: Measures the relative performance generated by the fund compared to the benchmark. An alpha of 1.0 indicates that the fund has outperformed its benchmark by 1%, after adjusting for risk of the benchmark.

Beta: Reflects sensitivity of the fund's returns to that of benchmark returns. A beta of 1.05 suggests that the fund could perform 5% better than the benchmark in up market and 5% worse in down market, assuming all other factors remain constant.

Exit Fee: Fee charged to investors when they redeem unit from a fund.

Information Ratio: Measures the funds returns above the benchmark returns relative to the risk (volatility) of the excess returns. It is a measure that identifies the consistency of the manager to outperform the benchmark.

Initial Fee: Fee charged to investors when they purchase units in a fund.

Management Fee: Percentage of the fund's assets that unitholders pay annually as remuneration to the investment adviser for managing the fund.

R Squared: Reflects the proportion of fund performance explained by changes in the benchmark. A high R-squared indicates the fund's performance has been in line with the benchmark. A low R-squared indicates the fund's performance has not been in line with the benchmark.

Service Fee: Percentage of fund's assets that retail unitholders pay annually for distribution services.

Sharpe Ratio: Measure of the fund's risk adjusted performance calculated as the portfolio returns in excess of the risk-free rate, divided by the risk (volatility) i.e. the Standard Deviation. The higher the Sharpe Ratio the better the returns compared to the risk taken.

Total Expense Ratio (TER): Estimated percentage (annualized) of fund assets used to pay for management fees and operating expenses, including service fees (if any) incurred by the fund. Fund expenses are reflected in the NAV. When calculating the TER, PineBridge has used the amount of expenses that it has received or estimated in its capacity as the Fund's Manager. Please note that the expense ratio includes variable expenses that are based on a number of factors including fund size, transactions, and other expenses. No assurance can be given that the TER will be realized over any future given period.

Tracking Error: Reflects the degree of variability of fund returns in relation to the benchmark. The lower the number the closer the fund's historic performance is to the benchmark.
