	Class A4D Units	Initial: HKD 10,000	Additional: HKD 1,000
	Class Y Units	Initial: USD 1,000,000	Additional: Nil
	Class YD Units	Initial: USD 1,000,000	Additional: Nil
	Class Y4 Units	Initial: HKD 10,000,000	Additional: Nil

¹ The ongoing charges figure is an annualized figure based on the expenses for the 6 months ended 30 June 2021 and expressed as a percentage over the average net asset value of the Class of Unit for the corresponding period. This figure may vary from year to year.

² As the Class is not yet launched, the ongoing charges figure is an annualized figure based on the estimated expenses for the 6 months ended 30 June 2021 and expressed as a percentage over the estimated average net asset value of the Class of Units for the corresponding period. This figure may change from year to year.

Class Y4D Units

Initial: HKD 10,000,000

Additional: Nil

WHAT IS THIS PRODUCT?

PineBridge Asia Pacific Investment Grade Bond Fund is a sub-fund of the PineBridge Global Funds (the "Fund"). The Fund is constituted in the form of a unit trust. It is domiciled in Ireland and its home regulator is the Central Bank of Ireland.

OBJECTIVES AND INVESTMENT STRATEGY

Objectives

The Sub-Fund will be managed to provide investors with stable return and long-term capital growth through investment in a wide range of investment grade debt securities within the Asia Pacific Region.

"Asia Pacific Region" includes Hong Kong, India, South Korea, Malaysia, The People's Republic of China, The Philippines, Singapore, Taiwan, Thailand, Japan, Australia, New Zealand and any other Asian country whose long term foreign currency sovereign credit rating is investment grade at the time of purchase.

Strategy

The Sub-Fund is an actively managed fund.

To achieve the Sub-Fund's investment objective, the Sub-Fund will invest in short, and medium to long term debt securities, with at least 70% of the Sub-Fund's net asset value in debt securities, predominantly denominated in USD, issued or guaranteed by entities based within the Asia Pacific Region. The Sub-Fund will invest in a broadly diversified range of investment grade debt securities which are further detailed below.

The Sub-Fund will, invest primarily (i.e. at least 70% of its net asset value) in USD denominated debt securities including commercial paper, bonds or other debt instruments such as callable bonds, putable bonds, hybrid securities, perpetual bonds and Sukuk bonds³ issued or guaranteed by Asia Pacific Region corporations or entities, obligations of supra-national community, regional or world institutions or organisations issued or guaranteed by Asia Pacific Region government or governmental subdivisions (e.g. province, local government, official jurisdictions, state, city, county, district or municipality), certificates of deposit, and bankers acceptances issued or supported by the credit of Asia Pacific Region banks. The Sub-Fund will also invest in US treasury debt securities of short, and medium to long term maturities.

The Sub-Fund will invest primarily (i.e. at least 70% of its net asset value) in fixed and / or floating rate debt securities. The average rating of securities held by the Sub-Fund is expected to be BBB+ or equivalent as rated by either Standard & Poor's or Moody's or Fitch.

Each debt security will have a minimum rating BBB- or equivalent at the time of purchase. Securities which fall below BBB- or equivalent after purchase may continue to be held by the Sub-Fund. In the event a substantial amount of the debt securities held by the Sub-Fund falls below BBB- or equivalent, the Sub-Fund shall dispose of a part or all of such holdings, acquire debt securities with a higher credit rating or adopt such other strategy with a view to achieving the above average rating.

The Sub-Fund has no restrictions as to the proportion of assets allocated to companies of any particular market capitalisation and may invest across a range of economic sectors.

The Sub-Fund may hold cash and / or ancillary liquid assets and invest up to 30% of its net asset value in money market instruments such as time deposits and certificates of deposit issued by investment grade rated entities or financial institutions. It may also hold deposits with credit institutions.

The Sub-Fund may, from time to time, invest more than 20% but up to 100% of its net asset value in securities of Emerging Markets within the Asia Pacific Region. "Emerging Markets" is defined as "is generally understood to refer to the markets of countries that are in the process of developing into modern industrialised states and thus display a high degree of potential but also entail a greater degree of risk.

The Sub-Fund may use financial derivative instruments ("FDIs") for efficient portfolio management (including hedging) purposes only. The Sub-Fund will not use FDIs extensively for any purpose. The Sub-Fund may engage in forward foreign exchange contracts, including non-deliverable forwards, for hedging purposes, to alter the currency exposure of the

³ A Sukuk bond is a Shariah (Islamic Law) compliant debt instrument.

underlying assets and may also hedge currency exchange risk by using FDIs for hedging purposes, enter in bond, interest rate or currency futures contracts, or use options (including puts, calls, straddles) on such futures contracts.

The Sub-Fund may invest up to 30% of its net asset value in debt instruments with loss-absorption features including certain Additional Tier 1 and Tier 2 capital instruments (some of which are contingent convertible debt securities), external LAC debt instruments under the Financial Institutions (Resolution) (Loss-absorbing Capacity Requirements – Banking Sector) Rules, debt instruments issued under a regime of non-Hong Kong jurisdictions which implements the Financial Stability Board's standards for "Total Loss-absorbing Capacity Term Sheet", non-preferred senior debt instruments, senior or subordinated debt instruments with features of contingent write-down or contingent conversion to ordinary shares on the occurrence of a trigger event and instruments issued under the resolution regime for financial institutions and other capital instruments issued by banks or other financial institutions.

USE OF DERIVATIVES

The Sub-Fund's net derivative exposure may be up to 50% of its net asset value.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

General Investment Risk (also known as Investment Loss Risk)

- The Sub-Fund's investment portfolio may fall in value due to any of the key risk factor below and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.
- The value of the Sub-Fund may be adversely affected by developments in political, economical and social conditions and policies of the markets in which it invests which may result in losses to your investment.
- **Investment in the Sub-Fund will not benefit from any deposit protection scheme.**

Fixed Income Investing Risk

- The value of investments in such securities may be impacted by market fluctuations, increases or decreases in interest rates, ability of issuers to make scheduled principal or interest payments, illiquidity in debt securities markets, ratings downgrading, economic recessions for example. The Sub-Fund is exposed to the credit/default risk of issuers of the debt securities that the Sub-Fund may invest in. The risk that such changes may adversely affect the price of fixed income securities can adversely affect the overall portfolio performance in any given period. Investment in the Sub-Fund is subject to interest rate risk. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise.

Fixed Income Credit Rating Risk

- Fixed income securities may be subject to credit rating downgrade risk. Downgrading of a fixed income security may adversely affect the valuation of such security and the value of the Sub-Fund. There may also be a higher risk of default in interest payment and principal repayment.
- In the event of such downgrading, the Manager or its delegates will promptly analyse such securities and the financials of the issuer of such securities to determine the action to be taken (i.e. hold, reduce or buy). However, the Manager may or may not be able to dispose of such downgraded securities.
- Credit ratings assigned by rating agencies are subject to limitations and may not always be an accurate or reliable measure of the strength of an investment being made and do not guarantee the creditworthiness of the security and/or issuer at all times. Where such credit ratings prove inaccurate or unreliable, losses may be incurred in such investment.

Fixed Income Default Risk

- The Sub-Fund invests in fixed income securities and there is a risk that a particular issuer may not fulfil its payment or other obligations. These events may increase the price volatility of the issuers' debt obligations and negatively affect liquidity making such debt obligations more difficult to sell. Particularly high (or increasing) levels of government deficit, amongst other factors, may adversely affect the credit rating of such sovereign debt securities and may lead to market concerns of higher default risk. In the unlikely event of default, the value of such securities may be adversely affected resulting in the loss of some or the entire invested amount.

Liquidity Risk

- Liquidity risk is defined as the risk that the Sub-Fund could not meet requests to redeem units issued by the Sub-Fund without significant dilution of remaining investors' interests in the Sub-Fund.

- From time to time, the investments or holdings of the Sub-Fund may face limited or reduced liquidity on the market, caused by decreased trading volume, increased price volatility, concentrated trading size, limitations on the ability to transfer or liquidate positions, and changes in industry or government regulations.

Sovereign Debt Risk

- The Sub-Fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. A government entity's willingness or ability to repay principal and interest due in a timely manner may be affected by its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the government entity's policy towards the International Monetary Fund and the political constraints to which a government entity may be subject etc.
- In the event that a government entity defaults on its sovereign debt, holders of sovereign debt, including a Sub-Fund, may be requested to participate in the rescheduling of such debt and to extend further loans to the relevant government entity. Such events may negatively impact the performance of a Sub-Fund and the Sub-Fund may suffer significant losses when there is a default of sovereign debt issuers.

Valuation Risk

- Valuation of the Sub-Fund's investment may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the Sub-Fund.

Concentration Risk

- The Sub-Fund may invest in Asia Pacific investment grade debt securities compared to more diversified funds or it may focus its investments and hold relatively large positions in, among other things, particular industries, countries, sectors, currencies or issuer. This may occur directly as a result of portfolio management decisions, or indirectly as a result of security price changes. Where this happens, the Sub-Fund may have a greater level of sensitivity to those industries, sectors, countries, currencies or issuers and the events, developments or issues that affect their prices. This may result in significant losses for the Sub-Fund, may increase the volatility of the value of the Sub-Fund, and may also limit the liquidity of certain securities within the Sub-Fund.

Emerging Markets Risk

- Investment in securities of companies or in certain securities markets considered as "emerging" or "developing" countries or markets involves a relatively higher degree of risk and may be considered speculative due to the absence of, amongst other things, developed legal structures governing private or foreign investments and private property, internationally comparable accounting, auditing and reporting standard and level of information transparency, significant adverse economic developments including substantial depreciation in currency exchange rates or unstable currency fluctuations.
- The size and volume of trading of securities markets of "emerging" or "developing" market issuers are currently small and low or non-existent, which might result in price volatility and lack of liquidity.
- Investments in "emerging" or "developing" markets entail increased risks and special considerations not typically associated with investment in more developed markets which include the possibility of political or social instability, adverse changes in investment or exchange control regulations, expropriation and withholding of dividends at source, liquidity risks, currency risks, taxation risks, settlement risks, custody risks and the likelihood of a high degree of volatility.

Market Volatility Risk (also known as Price of Securities Risk)

- All types of investments and all markets are at the risk of market volatility based on prevailing economic conditions. Some of the markets or exchanges on which the Sub-Fund may invest may prove to be highly volatile from time to time.

Country Concentration Risk

- A concentrated investment strategy may be subject to a greater degree of volatility and risk and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting a particular region that the Sub-Fund concentrates in, than a portfolio which is diversified across different geographic regions.

Risk associated with Distribution Out Of / Effectively Out of the Sub-Fund's Capital (also known as Capital Growth Risk)

- Dividends, if any, may be paid out of the capital of the Sub-Fund. Where the Manager determines in its discretion to pay distributions in respect of the Sub-Fund, investors should note that such distributions amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
- Such distributions may result in an immediate decrease in the net asset value of the Sub-Fund.

- Where a class is hedged, the distribution amount and net asset value may be adversely affected by currency fluctuations between the reference currency of the hedged class and the base currency of the Sub-Fund, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged classes.

Risk associated with instruments with Loss-Absorption Features

- Debt instruments with loss-absorption features are subject to greater risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of a trigger event (e.g., when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level), which are likely to be outside of the issuer's control. Such trigger events are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with loss-absorption features may also be exposed to liquidity, valuation and sector concentration risk.
- Coupon payments on certain debt instruments are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- In relation to non-preferred senior debt instruments, while these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.
- The Sub-Fund may invest in contingent convertible debt securities, commonly known as CoCos, which are highly complex and are of high risk. Upon the occurrence of the trigger event, CoCos may be converted into shares of the issuer (potentially at a discounted price), or may be subject to the permanent write-down to zero. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.

OTC Derivative Counterparty Risk (also known as Derivative Counterparty Exposure and Legal Risk or OTC Counterparty Rating Downgrading Risk)

- Investments in OTC derivative instruments are specifically arranged with a counterparty and are non-exchange traded. In case of bankruptcy or default of counterparty, trades in OTC derivative instruments could result in substantial losses to the Sub-Fund.

Financial Derivative Instruments Risk

- The leverage effect embedded in derivatives may result in substantial losses including and up to the total value of the assets of the Sub-Fund and the prices of derivatives can be highly volatile. The use of FDIs may expose the Sub-Fund to various types of risk, including but not limited to, counterparty, liquidity, correlation, credit, volatility, valuation and settlement risks which can have an adverse effect on the net asset value of the Sub-Fund.

ESG Data Risk

- Third party data may be used to determine environmental, social or governance ("ESG") factors and are based on backward-looking analysis. Data may be limited and subject to change.

ESG Categorisation Risk

- The categorisation of the Sub-Fund under the Regulation (European Union) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector may be affected by regulatory change or new technical standards/guidance coming into effect.

Sustainability Risk

- Sustainability risk is an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. While sustainability risk factors are considered in the investment process, investments may not exhibit positive / favourable ESG characteristics. Their value may still be negatively impacted by an ESG event or condition. An ESG focus may limit investment opportunities and the Sub-Fund may underperform compared to non-ESG funds or to the market as a whole.

HOW HAS THE SUB-FUND PERFORMED?

Class A has been chosen as the representative class as it is a retail class intended to be offered to Hong Kong investors. There is insufficient data to provide a useful indication of past performance to investors.

IS THERE ANY GUARANTEE?

This Sub-Fund does not have any guarantee. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES?

Charges which may be payable by you

You may have to pay the following fees when dealing in the Units of the Sub-Fund.

Fee	What you pay
Subscription fee (sales charge)	Up to 5.00% of the net asset value per unit of the subscription amount may be charged (applicable to Class A, AD, A4 and A4D Units only; currently nil for Class Y, YD, Y4 and Y4D Units)
Switching fee (switching charge)	Up to 3.00% of the net asset value per unit of the units switched may be charged (applicable to Class A, AD, A4 and A4D Units only; currently nil for Class Y, YD, Y4 and Y4D Units)
Redemption fee (redemption charge)	Up to 3.00% of the net asset value per unit of the units redeemed may be charged (applicable to Class A, AD, A4 and A4D Units only; currently nil for Class Y, YD, Y4 and Y4D Units)

Ongoing fees payable by the Sub-Fund

The following expenses will be paid out of the Sub-Fund. They affect you because they reduce the return you get on your investments.

Fee	Annual rate (as a % of the Sub-Fund's net asset value)	
Management fee	Class A Units	Up to 0.75% may be charged
	Class AD Units	Up to 0.75% may be charged
	Class A4 Units	Up to 0.75% may be charged
	Class A4D Units	Up to 0.75% may be charged
	Class Y Units	Up to 0.60% may be charged
	Class YD Units	Up to 0.60% may be charged
	Class Y4 Units	Up to 0.60% may be charged
	Class Y4D Units	Up to 0.60% may be charged
Custodian fee	Not Applicable	
Performance fee	Not Applicable	
Administration fee	Up to 0.30% may be charged	
Trustee fee	Up to 0.30% may be charged	
Unitholder servicing & maintenance fee ⁴	Class A Units	0.50%
	Class AD Units	0.50%
	Class A4 Units	0.50%
	Class A4D Units	0.50%
	Class Y Units	nil
	Class YD Units	nil
	Class Y4 Units	nil
	Class Y4D Units	nil
Hong Kong Representative fee	Up to 0.05% per annum of the value of the Sub-Fund attributable to Hong Kong investors introduced into the Sub-Fund by the Hong Kong Representative (PineBridge Investments Asia Limited) may be charged.	

Other fees

You may have to pay other fees when dealing in the units of the Sub-Fund.

⁴ The current annual rates may be increased up to a specified permitted maximum level as set out in the Prospectus of the Fund by giving not less than one month's prior notice to Unitholders.

ADDITIONAL INFORMATION

- The daily dealing cut-off time is 12:00 noon (Irish time) for subscription, redemption and switching orders to be received by the Administrative Agent. The Sub-Fund's next-determined net asset value per unit will be applied to each order. Please check with your distributor who may have a different internal dealing cut-off time.
- The net asset values per unit of this Sub-Fund are calculated and published on each day which is a bank business day in Ireland and also in Hong Kong. Net asset values per unit (for launched classes of units currently available in Hong Kong) are also published at the website address of www.pinebridge.com.hk*
- The past performance information of other unit classes offered to Hong Kong investors are available on the Fund's website www.pinebridge.com.hk*
- The compositions of the distributions (i.e. the relative amounts paid from (i) net distributable income and (ii) capital) (if any) for the last 12 months are available from the Manager or the Hong Kong Representative on request and also on the Fund's website www.pinebridge.com.hk*
