WHAT IS THIS PRODUCT?

PineBridge Asia ex Japan Equity Fund is a Sub-Fund of the PineBridge Global Funds (the “Fund”). The Fund is constituted in the form of a unit trust. It is domiciled in Ireland and its home regulator is the Central Bank of Ireland.

OBJECTIVES AND INVESTMENT STRATEGY

Objectives

The Sub-Fund seeks long-term capital appreciation by investing in the equity and equity-related securities of companies whose assets, products or operations are in the Asian Region. The Sub-Fund may also, to a lesser extent, invest in equity and equity-related securities of companies whose assets, products or operations are in Australia and New Zealand.

“Asian Region” includes Bangladesh, Hong Kong, India, Indonesia, South Korea, Malaysia, Pakistan, The People's Republic of China, The Philippines, Singapore, Sri Lanka, Taiwan and Thailand.

¹ The ongoing charges figure is an annualized figure based on the expenses for the 6 months ended 30 June 2021 and expressed as a percentage over the average net asset value of the class of unit for the corresponding period. This figure may vary from year to year.

² As the Class is not yet launched, the ongoing charges figure is an annualized figure based on the estimated expenses for the 6 months ended 30 June 2021 and expressed as a percentage over the estimated average net asset value of the class of unit for the corresponding period. This figure may vary from year to year.

Strategy

The Sub-Fund is an actively managed fund. A major proportion of the Sub-Fund's assets will be invested in large, well established companies with the remainder being invested in smaller companies. The Sub-Fund may use financial derivative instruments ("FDIs") including, but not limited to futures, options, swaps, forwards, and warrants for efficient portfolio management (including hedging) purposes only. The Sub-Fund may invest less than 30% of its net asset value in certain eligible China-A Shares via the Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect. The Sub-Fund will not use FDIs extensively for any purpose.

USE OF DERIVATIVES

The Sub-Fund's net derivative exposure may be up to 50% of its net asset value.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Equity Investing Risk

- The value of equity and equity-related securities will be affected by economic, political, market, and issuer-specific changes, regardless of company specific performance. Different industries, financial markets, and securities can react differently to these changes.
- The risk that one or more companies in a portfolio will fall, or fail to rise, can adversely affect the overall portfolio performance in any given period.

Emerging Markets Risk

- Investment in equity securities of companies in the Asian Region which may be considered as a "emerging" or "developing" country or market involves a relatively higher degree of risk and may be considered speculative due to the absence of, amongst other things, developed legal structures governing private or foreign investments and private property, internationally comparable accounting, auditing and reporting standard and level of information transparency, significant adverse economic developments including substantial depreciation in currency exchange rates or unstable currency fluctuations.
- The size and volume of trading of securities markets of "emerging" or "developing" market issuers are currently small and low or non-existent, which might result in price volatility and lack of liquidity.
- Investments in "emerging" or "developing" markets entail increased risks and special considerations not typically associated with investment in more developed markets which include the possibility of political or social instability, adverse changes in investment or exchange control regulations, expropriation and withholding of dividends at source, liquidity risks, currency risks, taxation risks, settlement risks, custody risks and the likelihood of a high degree of volatility.

Market Volatility Risk (also known as Price of Securities Risk)

- All types of investments and all markets are at the risk of market volatility based on prevailing economic conditions. Some of the markets or exchanges on which the Sub-Fund may invest may prove to be highly volatile from time to time.

Currency Risk – Base Currency

- Securities may be denominated in currencies different from the Sub-Fund's Base currency and there is a risk that changes in exchange rates and exchange control regulations may cause the value of the assets expressed in the Base Currency to rise or fall.

Counterparty Risk

- A Sub-Fund may have credit exposure to its trading parties and may also bear the risk of settlement default. In addition, misrepresentation or omission on the part of counterparty may adversely affect the valuation of the collateral underlying an investment.

Concentration Risk

- The Sub-Fund may invest in specific industry sectors / instruments compared to more diversified funds or it may focus its investments and hold relatively large positions in, among other things, particular industries, countries, sectors, currencies or issuers. This may occur directly as a result of portfolio management decisions, or indirectly as a result of security price changes. Where this happens, the Sub-Fund may have a greater level of sensitivity to those industries, sectors, countries, currencies or issuers and the events, developments or issues that affect their prices. This may result in significant losses for the Sub-Fund, may increase the volatility of the value of the Sub-Fund, and may also limit the liquidity of certain securities within the Sub-Fund.

Financial Derivative Instruments Risk

- The leverage effect embedded in derivatives may result in substantial losses including and up to the total value of the assets of the Sub-Fund and the prices of derivatives can be highly volatile. The use of FDIs may expose the Sub-Fund to various types of risk, including but not limited to, counterparty, liquidity, correlation, credit, volatility, valuation and settlement risks which can have an adverse effect on the net asset value of the Sub-Fund.

Risk associated with Distribution Out of / Effectively Out of the Sub-Fund's Capital (also known as Capital Growth Risk)

- Dividends, if any, may be paid out of the capital of the Sub-Fund. Where the Manager determines in its discretion to pay distributions in respect of the Sub-Fund, investors should note that such distributions amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
- Such distributions may result in an immediate decrease in the net asset value of the Sub-Fund.

Investment Loss Risk

- The instruments invested by the Sub-Fund may fall in value and therefore your investment in the Sub-Fund may suffer losses.
- The value of the Sub-Fund may be adversely affected by developments in political, economical and social conditions and policies of the markets in which it invests which may result in losses to your investment.

Risks associated with Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect (the "Stock Connect Risks")

- The relevant rules and regulations on Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect are subject to change which may have potential retrospective effect. Stock Connect Risks also include quota limitations. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to invest in China A-shares or access the PRC market through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

Risks associated with the Small and Medium Enterprise Board and/or ChiNext Market

- When investing in eligible China A shares through the Shenzhen-Hong Kong Stock Connect, the Sub-Fund may also be subject to risks associated with the Small and Medium Enterprise Board and/or ChiNext market such as higher fluctuation on stock prices, over-valuation risk, differences in regulations and delisting risk. Investments in the Small and Medium Enterprise Board and/or ChiNext market may result in significant losses for the Sub-Fund and their investors.

ESG Data Risk

- Third party data may be used to determine environmental, social or governance ("ESG") factors and are based on backward-looking analysis. Data may be limited and subject to change.

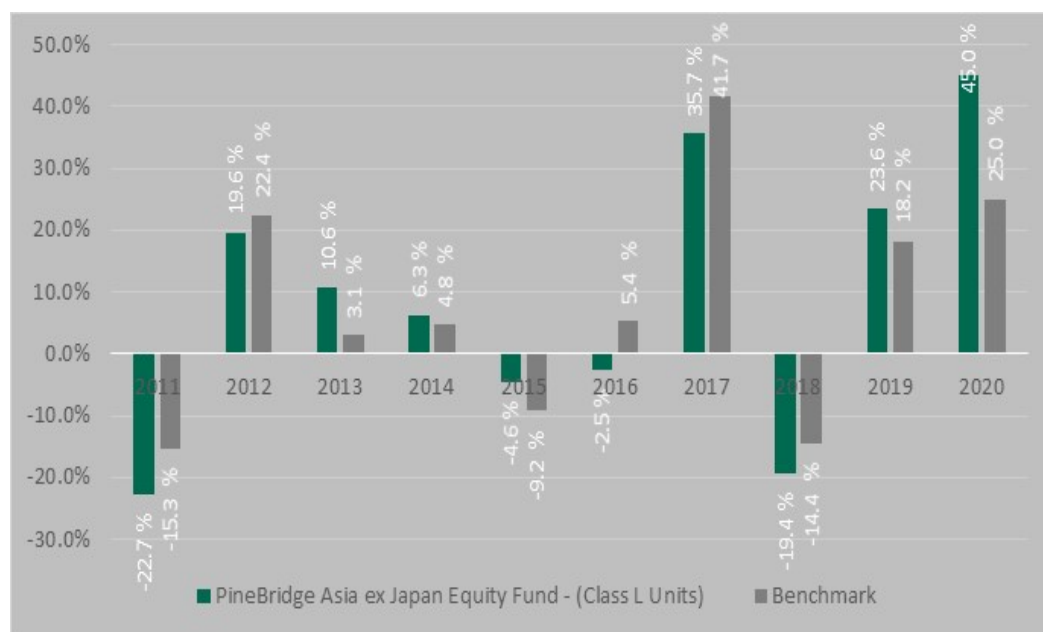

ESG Categorisation Risk

- The categorisation of the Sub-Fund under the Regulation (European Union) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector may be affected by regulatory change or new technical standards/guidance coming into effect.

Sustainability Risk

- Sustainability risk is an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. While sustainability risk factors are considered in the investment process, investments may not exhibit positive / favourable ESG characteristics. Their value may still be negatively impacted by an ESG event or condition. An ESG focus may limit investment opportunities and the Sub-Fund may underperform compared to non-ESG funds or to the market as a whole.

HOW HAS THE SUB-FUND PERFORMED?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the unit class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD, including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Class L is an active unit class available for Hong Kong retail investors. It has been chosen to be the representative unit class for disclosure of past performance information in this statement.
- Material change to the Sub-Fund: From 31 December 1998 to 30 November 2011, the benchmark of the Sub-Fund was MSCI All Country Far East ex Japan Daily Total Return Net Index. With effect from 1 December 2011, the benchmark of the Sub-Fund was changed to MSCI All Country Asia ex Japan Daily Total Return Net Index. Such change was made because the Investment Manager of the Sub-Fund reasonably considers that such benchmark of the Sub-Fund's indices have become the industry standard for the relevant exposure.
- The benchmark of the Sub-Fund is MSCI All Country Asia ex Japan Daily Total Return Net Index. It is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of Asia, excluding Japan.
- The Sub-Fund seeks to deliver excess returns over the Sub-Fund's benchmark. The holdings may or may not be components of the benchmark and the Investment Manager has discretion to deviate entirely from the benchmark securities, weightings and risk characteristics. The degree to which the Sub-Fund resembles the composition and risk characteristics of the benchmark is not a specifically targeted outcome and could vary over time, and the Sub-Fund's performance may be meaningfully different from the Sub-Fund's benchmark.
- Sub-Fund / Class L launch date: 26 July 1991

IS THERE ANY GUARANTEE?

This Sub-Fund does not have any guarantee. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES?

Charges which may be payable by you

You may have to pay the following fees when dealing in the Units of the Sub-Fund.
