	Class Y Units	Initial: USD 1,000,000	Additional: Nil

WHAT IS THIS PRODUCT?

PineBridge Latin America Equity Fund is a sub-fund of the PineBridge Global Funds (the “Fund”). The Fund is constituted in the form of a unit trust. It is domiciled in Ireland and its home regulator is the Central Bank of Ireland.

OBJECTIVES AND INVESTMENT STRATEGY

Objectives

The Sub-Fund seeks to achieve a superior rate of return by making equity and equity-related investments in companies operating in the economies of Latin America.

Strategy

The Sub-Fund is an actively managed fund. The Sub-Fund will invest at least two-thirds of its total assets in transferable securities of issuers domiciled in or exercising the predominant part of their commercial activities in Brazil, Mexico, Chile, Argentina, Peru, Venezuela and Colombia. The remaining one-third assets of the Sub-Fund may invest in transferable securities not meeting the above requirements, including investments in other Latin American countries.

¹ The ongoing charges figure is based on the expenses for the 12 months ended 31 December 2021 and expressed as a percentage over the average net asset value of the class of unit for the corresponding period. This figure may vary from year to year.

² As the Class is not yet launched, the ongoing charges figure is based on the estimated expenses for the 12 months ended 31 December 2021 and expressed as a percentage over the estimated average net asset value of the class of unit for the corresponding period. This figure may vary from year to year.

The Sub-Fund may use financial derivative instruments (“FDIs”) including, but not limited to futures, options, swaps, forwards, and warrants for efficient portfolio management (including hedging) and for investment purposes. The Sub-Fund will not use FDIs extensively for any purpose.

Global exposure (as prescribed in the Central Bank UCITS Regulations) and leverage as a result of its investment in FDIs shall not exceed 35% of the net asset value of the Sub-Fund on a permanent basis.

The Sub-Fund has no restrictions as to the proportion of assets allocated to companies of any particular market capitalisation and may invest across a range of economic sectors and industries.

USE OF DERIVATIVES

The Sub-Fund’s net derivative exposure may be up to 50% of its net asset value.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

Equity Investing Risk

- The value of equity and equity-related securities will be affected by economic, political, market, and issuer-specific changes, regardless of company specific performance. Different industries, financial markets, and securities can react differently to these changes.
- The risk that one or more companies in a portfolio will fall, or fail to rise, can adversely affect the overall portfolio performance in any given period.

Emerging Markets Risk

- Investment in securities of companies or in certain securities markets considered as “emerging” or “developing” countries or markets involves a relatively higher degree of risk and may be considered speculative due to the absence of, amongst other things, developed legal structures governing private or foreign investments and private property, internationally comparable accounting, auditing and reporting standard and level of information transparency, significant adverse economic developments including substantial depreciation in currency exchange rates or unstable currency fluctuations.
- The size and volume of trading of securities markets of “emerging” or “developing” market issuers are currently small and low or non-existent, which might result in price volatility and lack of liquidity.
- Investments in “emerging” or “developing” markets entail increased risks and special considerations not typically associated with investment in more developed markets which include the possibility of political or social instability, adverse changes in investment or exchange control regulations, expropriation and withholding of dividends at source, liquidity risks, currency risks, taxation risks, settlement risks, custody risks and the likelihood of a high degree of volatility.

Concentration Risk

- The Sub-Fund may invest in specific industry sectors / instruments compared to more diversified funds or it may focus its investments and hold relatively large positions in, among other things, particular industries, countries, sectors, currencies or issuers. This may occur directly as a result of portfolio management decisions, or indirectly as a result of security price changes. Where this happens, the Sub-Fund may have a greater level of sensitivity to those industries, sectors, countries, currencies or issuers and the events, developments or issues that affect their prices. This may result in significant losses for the Sub-Fund, may increase the volatility of the value of the Sub-Fund, and may also limit the liquidity of certain securities within the Sub-Fund.

Currency Risk – Base Currency

- Securities may be denominated in currencies different from the Sub-Fund's Base Currency and there is a risk that changes in exchange rates and exchange control regulations may cause the value of the assets expressed in the Base Currency to rise or fall and the net asset value of the Sub-Fund may be affected unfavourably by such fluctuations and by changes in exchange rate controls.

Financial Derivative Instruments Risk

- The leverage effect embedded in derivatives may result in substantial losses including and up to the total value of the assets of the Sub-Fund and the prices of derivatives can be highly volatile. The use of FDIs may expose the Sub-Fund to various types of risk, including but not limited to, counterparty, liquidity, correlation, credit, volatility, valuation and settlement risks which can have an adverse effect on the net asset value of the Sub-Fund.

Counterparty Risk – Depository

- There are risks involved in dealing with the Trustee, sub-custodians or brokers who hold the Sub-Fund's investments or settle the Sub-Fund's trades. The assets of the Fund are entrusted to the Trustee for safekeeping and there is no guarantee they will successfully do so and it does not exclude the risk of non-restitution in the case of bankruptcy or insolvency of the Trustee. Investors are therefore exposed to the risk of the Trustee not being able to fully meet its obligation to reconstitute all of the assets of the Sub-Fund in the case of bankruptcy or insolvency of the Trustee. In addition, the Sub-Fund's cash held with the Trustee may not be segregated from the Trustee's own cash/cash under custody for other clients of the Trustee and the Sub-Fund may therefore rank as an unsecured creditor in the case of bankruptcy or insolvency of the Trustee. The Trustee may not keep all the assets of the Fund itself but may use a network of sub-custodians which are not always part of the same group of companies as the Trustee.
- Investors may be exposed to the risk of bankruptcy of the sub-custodians in circumstances where the Trustee may have no liability.

Liquidity Risk

- Liquidity risk is defined as the risk that the Sub-Fund could not meet requests to redeem units issued by the Sub-Fund without significant dilution of remaining investors' interests in the Sub-Fund.
- From time to time, the investments or holdings of the Sub-Fund may face limited or reduced liquidity on the market, caused by decreased trading volume, increased price volatility, concentrated trading size, limitations on the ability to transfer or liquidate positions, and changes in industry or government regulations.

Counterparty Risk

- A Sub-Fund may have credit exposure to its trading parties and may also bear the risk of settlement default. In addition, misrepresentation or omission on the part of counterparty may adversely affect the valuation of the collateral underlying an investment.

Contract for Difference Risk

- By entering into a contract for difference ("CFD"), a party undertakes to pay (or receive) in cash the difference between the valuation of the underlying asset at the time of entering into the contract and the valuation of the underlying asset at a specified moment in the future. As CFDs are traded over the counter, it is subject to FDI risk, notably counterparty risk, liquidity risk, market volatility risk because of the high leverage as well as margin risk similar to futures.

Risk associated with Distribution Out of / Effectively Out of the Sub-Fund's Capital (also known as Capital Growth Risk)

- Dividends, if any, may be paid out of the capital of the Sub-Fund. Where the Manager determines in its discretion to pay distributions in respect of the Sub-Fund, investors should note that such distributions amount to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment.
- Such distributions may result in an immediate decrease in the net asset value of the Sub-Fund.

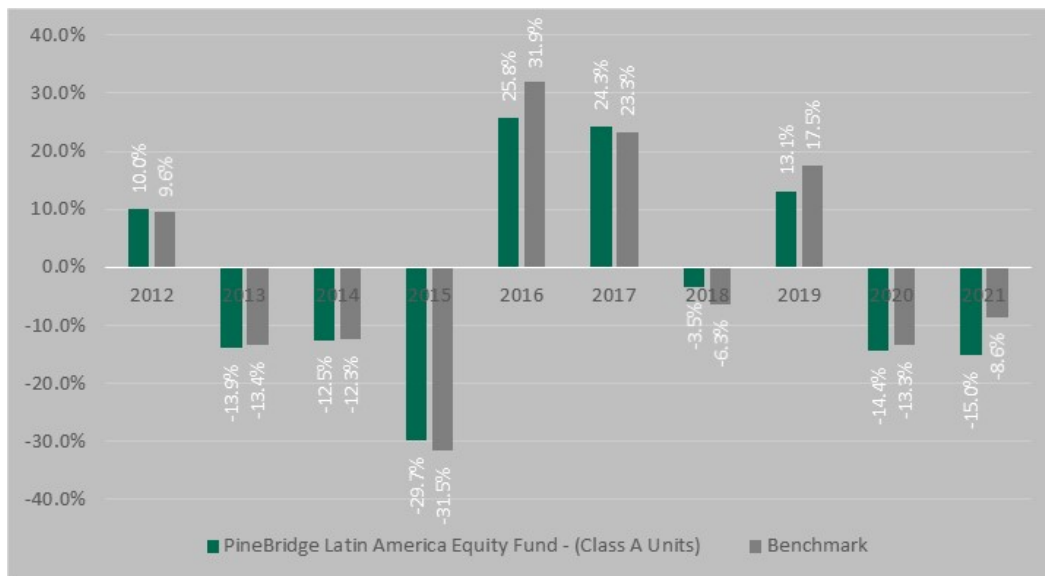

Investment Loss Risk

- The instruments invested by the Sub-Fund may fall in value and therefore your investment in the Sub-Fund may suffer losses.
- The value of the Sub-Fund may be adversely affected by developments in political, economical and social conditions and policies of the markets in which it invests which may result in losses to your investment.

ESG Risks

- The Sub-Fund is subject to environmental, social or governance ("ESG") related risks and sustainability risk. Sustainability risk is an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. Third party data may be used to determine ESG factors and are based on backward-looking analysis, and the data may be limited and subject to change. The categorisation of the Sub-Fund under the Regulation (European Union) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector may be affected by regulatory change or new technical standards/guidance coming into effect.

HOW HAS THE SUB-FUND PERFORMED?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the unit class increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD, including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Class A is an active unit class available for Hong Kong retail investors. It has been chosen to be the representative unit class for disclosure of past performance information in this statement.
- Material Change to the Sub-Fund: From inception to 31 December 2007, the benchmark of the Sub-Fund was MSCI Emerging Markets Latin America Daily Total Return Net Index. From 1 January 2008 to 20 March 2016, the benchmark of the Sub-Fund was changed to MSCI Emerging Markets Latin America 10/40 Equity Daily Total Return Net Index. On 21 March 2016, the benchmark of the Sub-Fund was changed to MSCI Emerging Markets Latin America Daily Total Return Net Index. Such change was made because the Investment Manager of the Sub-Fund reasonably considers that such benchmark is more reflective of the Sub-Fund’s investment strategy and universe than the previous benchmark.
- The benchmark of the Sub-Fund is MSCI Emerging Markets Latin America Daily Total Return Net Index. It is a free float-adjusted market capitalisation index that is designed to measure equity market performance of companies in emerging markets in Latin America.
- Sub-Fund launch date: 1 January 1993
- Class A launch date: 1 August 2006

IS THERE ANY GUARANTEE?

This Sub-Fund does not have any guarantee. You may not get back the full amount of money you invest.

WHAT ARE THE FEES AND CHARGES?

Charges which may be payable by you
